

2010-2011 AISD Parent Survey ALC High School

Strong relationships among staff, students, and parents are critical to student success. In particular, parent involvement in education is associated with a high level of student achievement (for a meta-analysis see Fan & Chen, 2001). These survey results provide campuses with feedback on how parents feel about their treatment by school staff, the school's educational environment, and how parents describe their involvement in their child's education. The following report contains the results of the 2010-2011 Parent Survey for Austin Independent School District (AISD); longitudinal data are provided where applicable.

A summary of ALC High School survey results for the 2010-2011 school year is presented in figure 1. Scores over 3.0 are desirable, as indicated by the green line. Also, please note the green and red boxes that highlight the specific area in which ALC most excels, as well as the area in which ALC can improve most.

Figure 1. Parent Survey subscales for ALC High School and all AISD High Schools, 2010-2011

ALC's highest score on the 2010-2011 Parent Survey was Respectful School Community, which refers to the extent to which parents perceive that staff provide a welcoming, respectful environment for students and their families. We encourage you to continue fostering this kind of environment on your campus and to share the best practices that lead to a respectful school community.

ALC's lowest score on the 2010-2011 Parent Survey was Parental Assistance, Communication, and School Involvement. This subscale asks parents to report the frequency with which they participated in a variety of school-related activities, both at home and at their child's school. We encourage your campus to consider ways to work with parents to promote their involvement in their child's education.

Note. In addition to the subscales reflected in figure 1, parents responded to items regarding the Superintendent and Central Office Staff. For more information, see page 8.
