RESULTS FOR ANDERSON

Survey results for Anderson for the past 3 years are summarized here, along with 2008-2009 results for all AISD high schools. To indicate which changes are most meaningful from year to year, statistically significant changes are flagged with up or down arrows ().²

The survey questions were grouped by topic into seven subscales. Table 4 on the following page provides an overview of the results by subscale, and subsequent tables provide the results for every question subscale. Parents responded to each statement by indicating their level agreement on a four-point scale ranging from "Strongly Disagree" to "Strongly Agree," with the option of indicating "Don't know/NA" or of skipping any item. It is desirable to have an average of **3.0 or higher**
