

Research indicates that school climate can either be a positive influence on students' learning environment, or can serve as a significant barrier to students' learning. Researchers have documented that positive ratings of student climate to contribute to factors that help high economically disadvantaged schools "beat the odds" (Voight, Austin & Hanson, 2013). Indeed, students at high-performing AISD schools with high levels of economic disadvantage had more positive ratings of behavioral environment and adult fairness and respect in Spring 2013 than did students at lower performing schools AISD with similar levels of economic disadvantage (Lamb, 2014).

The following tables show the total number of surveys students at Andrews completed in 2013-2014 (Table 1) and the response rate by grade (Table 2).

# of surveys returned	193	16,960
# of students	241	19,770
% of students represented	80%	86%

grade	# of students enrolled	# of responses	response rate
3rd grade	79	80	101%
4th grade	69	63	91%
5th grade	n/a	n/a	n/a%
