

## 2009-2010 AISD Campus Staff Climate Survey

### Baranoff Elementary School

A healthy school climate is characterized by positive relationships among students, all campus staff, and the community. School climate is a key factor in several important outcomes including student achievement, reduced violence, higher morale, and faculty trust (Hoy, Smith, & Sweetland, 2002). More specifically, research in AISD indicates that staff climate survey results are related to student Texas Assessment of Knowledge and Skills (TAKS) performance in both math and reading (Bush-Richards, Cornetto, & Schmitt, 2008; Schmitt, 2006). The figure below represents how campus climate can facilitate student academic growth.

The image below displays factors that are known to be related to student academic growth. In this report, we focus on Staff Climate (circled in red), which has been measured with seven survey subscales: Teacher Support, Community Engagement, Collegial Leadership, Professional Teacher Behavior, Achievement Press, General Climate and Data Vision.

In Fall 2009, 92% of teachers from Baranoff responded to the survey. Figure 3 represents the percentage of respondents at Baranoff (depicted in dark green) and across all Elementary Schools (light blue) who identified themselves as teachers, classified/support staff, or administrators and non-teaching professionals, plus the number who did not specify a staff role. This information will help you to generalize the findings to the rest of your campus community.

Staff results for Baranoff for the 2009-10 school year year are highlighted on the next page. Please pay close attention to the call-out boxes that appear in red and green as they highlight specific campus climate areas that Baranoff can improve, as well as areas in which Baranoff excels. You may visit the following websites for resources and tips on how to improve campus climate in general, and specific resources for improving the area of Baranoff's lowest subscale score are provided on the next page.

The appendix provides you with more detailed information regarding Baranoff's campus climate from 2007-08 through 2009-10. Please review the individual items on each subscale with particular attention to how Baranoff's average ratings have changed or remained consistent over time. To indicate which changes are most meaningful from year to year, statistically meaningful changes are flagged with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.

The graphs below depict Baranoff’s staff climate ratings over time, as well staff climate ratings across all Elementary Schools in 2009-10. Scores over 3.0 are desirable, as indicated by the red dashed line in the graphs below. The first step in improving campus climate is to examine the score for each area (Figure 2).

For 2009-10, Baranoff staff rated **Community Engagement** the highest of all climate areas. Alternatively, Baranoff staff rated **Collegial Leadership** the lowest of all climate areas. In the appendix, you will find the individual items that make up **Community Engagement** and **Collegial Leadership**. Examine these items and consider possible areas for campus improvement. Make note of any item with an arrow, which indicates an average rating that is meaningfully higher or lower than that of the previous year. Discuss these areas of strength and challenge with staff, and note the ways in which initiatives on campus have addressed or could address these issues during the current or next school year.

Baranoff’s highest subscale on the 2009-10 staff climate survey was Community Engagement, which refers to the extent to which the school has fostered a productive relationship with its community and can count on involvement and support from parents and community members. This subscale also measures the degree to which the school provides the community with information about its accomplishments.

Baranoff’s lowest subscale score on the 2009-10 staff climate survey was Collegial Leadership, which measures the extent to which principals treat teachers and staff with openness, egalitarianism, and friendliness and set clear expectations for performance. Collegial Leadership has been linked to student academic achievement.
