

## 2009-2010 AISD Parent Survey Bowie High School

Strong relationships among staff, students, and parents are critical to student success. In particular, parent involvement in education is associated with a high level of student achievement (for a meta-analysis see Fan & Chen, 2001). These survey results provide campuses with feedback about how parents feel about their treatment by school staff, and the school's educational environment, and how parents describe their child's education. The following report contains the results of the 2009-2010 Parent Survey for Austin Independent School District (AISD); longitudinal data are provided where applicable.

The image below displays factors that are known to be related to student academic growth. In this report, we focus on the role of parents (circled in red), which has been measured with six survey subscales: Respectful School Community; Information about Student Expectations and Progress; Academic Planning Information; Teacher Expectations; Support for Parental Involvement; and Parental Assistance, Communication and School Involvement.

In Spring 2009, 242 parents returned surveys for Bowie, representing 9% of students from Bowie (compared to the district High School response, 9%). Figure 1 represents the percentage of respondents with children at Bowie from each ethnic group. The tables below show the total number of surveys Bowie parents returned in 2009-2010, and the percentage of responses and students at Bowie represented by each grade.

Number of Respondents Bowie	
# of surveys returned	242
# of students	2,813
% of students represented	9

% of students represented by grade		
grade	% of respondents	% School population
9th	27	28
10th	28	26
11th	24	24
12th	20	22

The appendix provides more detailed information regarding Bowie's parent survey results from 2007-2008 through 2009-2010. Please review the individual items on each subscale with particular attention to how Bowie's average ratings have changed or remained consistent over time. Please note that some subscales have changed from previous years, making longitudinal comparisons inappropriate for some items and subscales. For items and subscales where longitudinal data are available, statistically meaningful changes are flagged with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.

The graph below depicts Bowie’s parent survey ratings over time, as well as parent survey ratings across all High Schools in 2009-2010. Scores over 3.0 are desirable, as indicated by the red dashed line in the graph below. The first step in improving these characteristics is to examine the score for each area (Figure 2).

Note. The light blue bars represent 2009-2010 data for Bowie and the dark blue bars represent 2009-2010 data for all High Schools.

Bowie’s highest score on the 2009-2010 Parent Survey was Teacher Expectations. This measure was new to the 2009-2010 survey and is designed to measure expectations parents believe that teachers have for their children. Research shows that teacher expectations relate to academic achievement. We encourage your campus to continue fostering a positive learning environment with rigorous teacher expectations for all students.

Bowie’s lowest score on the 2009-2010 Parent Survey was Parental Assistance, Communication, and School Involvement, which measures the extent to which parents spend with their child on school-related activities. Parental involvement contributes positively to academic achievement.
