## RESULTS FOR BOWIE HIGH SCHOOL

Survey results for Bowie for the past 3 years are summarized here. To indicate which changes are most meaningful from year to year, statistically significant changes are flagged with up or down arrows ( ).<sup>4</sup> To help put results in context, 2008-2009 results also are provided for all AISD High School campus staff. Table 2 provides an overview of the results for Bowie by subscale for the past 3 years.

Campuses with higher Overall Climate scores are characterized by more positive relationships among administrators, staff, teachers, and students. If Bowie's Overall Climate score was over 3.0, the staff viewed the school environment positively. If Bowie's Overall Climate score was below 2.5, the campus did not have a positive school climate. Scores between 2.5 and 3.0 indicate a fair school climate. School Climate and Behavior Management subscale scores can be interpreted in a similar fashion (i.e., it is desirable to have scores at 3.0 or above). Bowie's PBS score represents the average percentage of respondents who indicated *yes* when asked about PBS-related knowledge and behaviors.

## SCHOOL CLIMATE DIMENSIONS

The first step in improving campus climate is to look at the score for each of the Climate subscales (Table 2). These scores can help in identifying areas in which staff ratings were higher or lower than the desired subscale scores.

For 2008-2009, the highest Climate subscale for Bowie was Professional Teacher Behavior. Examine the individual items that make up Professional Teacher Behavior and identify those that are particularly positive. Make note of any item that has a score marked by an arrow that indicates it is statistically higher than scores for that item in previous years. Discuss this area of strength with staff and note the ways in which initiatives on campus have addressed these issues in particular during the current school year.

To improve campus climate, it is beneficial to focus on subscales with the lowest scores. For example, **for 2008-2009**, **the lowest Climate subscale for Bowie was Collegial Leadership**. Examine the individual items contributing to Collegial Leadership in the table below. Examine these individual items and their average responses to determine possible areas for campus

**Collegial Leadership**. Collegial Leadership involves treating teachers and staff as professional colleagues, and with openness, egalitarianism, and friendliness, but at the same time setting clear expectations and standards for performance. This subscale consisted of 7 items that addressed the degree to which the principal met the social needs of the faculty and worked toward achieving the goals of the school. The individual item and average subscale scores for Bowie and for all High Schools are shown in Table 4.

Achievement Press. Achievement press is marked by students who persist, strive to achieve, and are respected by each other and teachers for their academic successes. This subscale consisted of 8 items that described the extent to which Bowie has set high but achievable academic standards and goals. In addition, this subscale measured the extent to which parents, teachers, and principals exert pressure for high standards and school improvement. The individual item and average subscale scores for Bowie and for all High Schools are shown in Table 6.

## SCHOOL SAFETY, BEHAVIOR MANAGEMENT, AND POSITIVE BEHAVIOR SUPPORT

The next section of the survey addressed the safety of the school environment for students and staff, including the prevalence of undesirable student behavior on campus, staff satisfaction with how student behavior was managed on each campus, and staff familiarity with issues related to PBS.

**Undesirable Student Behaviors**. These items measured staff reports about the frequency of selected undesirable student behaviors on campus. The items were rated on a scale of 0 (*never happens*) to 4 (*happens daily*). The individual item and average subscale scores for Bowie and for all High Schools are shown in Table 8. Items with *high* average responses (above 2.0) should be prioritized for improvement.
