

2009-2010 AISD Parent Survey Campbell Elementary School

Strong relationships among staff, students, and parents are critical to student success. In particular, parent involvement in education is associated with a high level of student achievement (for a meta-analysis see Fan & Chen, 2001). These survey results provide campuses with feedback about how parents feel about their treatment by school staff, and the school's educational environment, and how parents describe their child's education. The following report contains the results of the 2009-2010 Parent Survey for Austin Independent School District (AISD); longitudinal data are provided where applicable.

The image below displays factors that are known to be related to student academic growth. In this report, we focus on the role of parents (circled in red), which has been measured with six survey subscales: Respectful School Community; Information about Student Expectations and Progress; Academic Planning Information; Teacher Expectations; Support for Parental Involvement; and Parental Assistance, Communication and School Involvement.

The graph below depicts Campbell's parent survey ratings over time, as well as parent survey ratings across all Elementary Schools in 2009-2010. Scores over 3.0 are desirable, as indicated by the red dashed line in the graph below. The first step in improving these characteristics is to examine the score for each area (Figure 2).

Figure 2. Parent Survey Subscales for Campbell and all Elementary Schools, 2009-2010

Note.

Campbell's highest score on the 2009-2010 Parent Survey was Teacher Expectations. This measure was new to the 2009-2010 survey and is designed to measure expectations parents believe that teachers have for their children. Research shows that teacher expectations relate to academic achievement. We encourage your campus to continue fostering a positive learning environment with rigorous teacher expectations for all students.
