SUMMARY OF 2005-2006 THROUGH 2007-2008 AISD STAFF CLIMATE SURVEY RESULTS

CUNNINGHAM ELEMENTARY SCHOOL

A healthy school climate is characterized by positive relationships among students, all campus staff, and the community. School climate is a key factor in several important outcomes such as student achievement, reduced violence, higher morale, and faculty trust (Hoy, Smith, & Sweetland, 2002). More specifically, research in Austin ISD indicates that staff climate survey results are related to student TAKS performance in both math and reading (Schmitt, 2006; Bush-Richards, Cornetto, & Schmitt, 2008). The AISD Staff Climate Survey was developed from the research-based Organizational Climate Inventory (OCI), which measures four sub-dimensions of climate (Hoy et al., 2002) called *External Influences, Collegial Leadership, Professional Teacher Behavior*, and *Achievement Press.* In addition to the published OCI items, the staff climate survey includes a series of climate items and safety items designed for relevance to all campus staff. Related items are grouped together in *subscales*, and the average across the items is computed as a *subscale score*. Subscale scores have been averaged to provide an overall climate score.

While changes between years 2006-2007 and 2007-2008 were not statistically significant, some patterns in the data were noted. Compared to last year, responses across all elementary schools wersthmorie favorable.ar1ypi[fu9wD0TDne noted. Comps@YJ00a06Hosd08021eSc-0.04c- score)Tn5 0l im(subscales

Collegial Leadership. This subscale consists of 7 items that address the degree to which the principal meets the social needs of the faculty as well as works toward achieving the goals of the school. Collegial leadership involves treating teachers and staff as professional colleagues, with openness, egalitarianism, and friendliness, but at the same time setting clear expectations and standards for performance.

Table 4. Results for Collegial Leadership

	Cunningham	Cunningham	Cunningham	All EL
	EL	EL	EL	Average
'	Avg 2005-06	Avg 2006-07	Avg 2007-08	

Note: It is desirable to have an average response of at least 3.0, indicated in **bold** type. ^aItem was reverse-scored such that a response of "Rarely Occurs" was scored as a 4. á â indicate increases and decreases from the previous year.

Achievement Press. This subscale consists of 8 items that describe the extent to which the school has set high but achievable academic standards and goals. Achievement press is marked by students who persist, strive to achieve, and are respected by each other and teachers for their academic successes. In addition, this subscale measures the extent to which parents, teachers, and principals exert pressure for high standards and school improvement.

Note: It is desirable to have an average response of at least 3.0, indicated in **bold** type. ^aItem was reverse-scored such that a response of "Rarely Occurs" was scored as a 4. á â indicate increases and decreases from the previous year.

Frequency of Selected Student Behaviors. This subscale measures the frequency of selected undesirable student behaviors. The items were rated on a scale of 0 (*Never Happens*) to 4 (*Happens Daily*). Average scores for each item are shown in the table that follows.

Table 8. Results for Frequency of Undesirable Student Behaviors

To the best of your knowledge,	Cunningham	Cunningham	Cunningham
how often do the following	EL	EL	EL
events occur at your school?	Avg 2005-06	Avg 2006-07	Avg 2007-08

Note: It is desirable to have an average response of *less than 2.0*, indicated in **bold** type. á â Indicate increases and decrease in the frequency of each behavior from the previous year.

Safety. The frequency and prevalence of undesirable student behaviors have been combined to form a score that indicates the overall staff perception of student behaviors. Scores have been converted to range from 1 (least desirable) to 4 (most desirable).

The first step in improving campus climate	is to look at your school's score for each of the
climate subscales (shown in Table 2 on page	e 2). These will help you to identify areas where
