Note. Some parents chose not to report their child's grade level; thus, percentages may not sum to 100%. Student population data are based on January enrollment, and may differ from the official AEIS report.

RESULTS FOR DAVIS

Survey results for Davis for the past 3 years are summarized here, along with 2008-2009 results for all AISD elementary schools. To indicate which changes are most meaningful from year to year, statistically significant changes are flagged with up or down arrows (↑ ↓).²³

The survey questions were grouped by topic into seven subscales. Table 4 on the following page provides an overview of the results by subscale, and subsequent tables provide the results for every question subscale. Parents responded to each statement by indicating their level agreement on a four-point scale ranging from "Strongly Disagree" to "Strongly Agree," with the option of indicating "Don't know/NA" or of skipping any item. It is desirable to have an average of **3.0 or higher** for each item and subscale, indicated in **bold**.

Carefully examine the results for your campus to determine areas of strength and opportunities for improvement. Areas of strength can be identified by subscale averages at or **above 3.0**. Opportunities for improvement can be identified by subscale or item averages below 2.5. If the averages for Davis are very different
