

Strong relationships among staff, students, and parents are critical to student success. In particular, parent involvement in education is associated with higher student achievement (for a meta-analysis see Fan & Chen, 2001). These survey results provide campuses with feedback about how parents feel about their treatment by school staff, the school's educational environment, and their own involvement in the school. The following report contains the results of the 2008-2009 AISD Parent Survey for Harris, and longitudinal data are provided where applicable. In addition, averages are provided for all AISD Elementary schools. Table 1 provides a summary of respondents for Harris. Parents who respond to this survey tend to be representative of the AISD student population in terms of ethnicity and grade level; data for the parents who responded for Harris can be found in Tables 2 and 3.

## Table 3. Respondents' Child's Grade Level Compared to Harris Population

*Parent Achievement Press.* This subscale consists of 5 items that describe the extent to which parents exert pressure for high standards by engaging in conversations about academic priorities both their child and the school staff. The individual item and subscale averages are provided in Table 9.

## Table 11. Percentage of Parents Reporting That They Participate in School Activities

Finally, parents were asked about their familiarity with sources for state and federal accountability ratings. Table 12 summarizes these ratings.
