2009-2010 AISD Parent Survey Harris Elementary School

Strong relationships among staff, students, and parents are critical to student success. In particular, parent involvement in education is associated with a high level of student achievement (for a meta-analysis see Fan & Chen, 2001). These survey results provide campuses with feedback about how parents feel about their treatment by school staff, and the school's educational environment, and how parents describe their child's education. The following report contains the results of the 2009-2010 Parent Survey for Austin Independent School District (AISD); longitudinal data are provided where applicable.

The image below displays factors that are known to be related to student academic growth. In this report, we focus on the role of parents (circled in red), which has been measured with six survey subscales: Respectful School Community; Information about Student Expectations and Progress; Academic Planning Information; Teacher Expectations; Support for Parental Involvement; and Parental Assistance, Communication and School Involvement.

In Spring 2009, 508 parents returned surveys for Harris, representing 69% of students from Harris (compared to the district Elementary School response, 34%). Figure 1 represents the percentage of respondents with children at Harris from each ethnic group. The tables below show the total number of surveys Harris parents returned in 2009-2010, and the percentage of responses and students at Harris represented by each grade.

Number of Respondents Harris		
# of surveys returned	508	
# of students	740	
% of students represented	69	

Native American

Asian American

Figure 1. Percentage of Respondents and Students by Ethnicity for Harris, 2009-2010

% of students represented by grad			
grade	% of respondents	% School population	
PK	13	16	
K	20	17	
1st	14	15	
2nd	17	15	
3rd	10	13	
4th	11	12	
5th	10	11	
6th	n/a	n/a	

Survey results for Harris Elementary School for the 2009-2010 school year are presented on the next page. Please note the green and red text boxes that highlight specific areas in which Harris excels, as well as areas in which Harris can improve. The following websites contain resources and tips on how to improve areas measured with the parent survey.

The US Department of Education http://www.dww.ed.gov/
The National Center for Parental Involvement in Education: http://www.ncpie.org
The Harvard Family Research Project http://www.hfrp.org/

The appendix provides more detailed information regarding Harris's parent survey results from 2007-2008 through 2009-2010. Please review the individual items on each subscale with particular attention to how Harris's average ratings have changed or remained consistent over time. Please note that some subscales have changed from previous years, making longitudinal comparisons inappropriate for some items and subscales. For items and subscales where longitudinal data are available, statistically meaningful changes are flagged with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.

The graph below depicts Harris's parent survey ratings over time, as well as parent survey ratings across all Elementary Schools in 2009-2010. Scores over 3.0 are desirable, as indicated by the red dashed line in the graph below. The first step in improving these characteristics is to examine the score for each area (Figure 2).

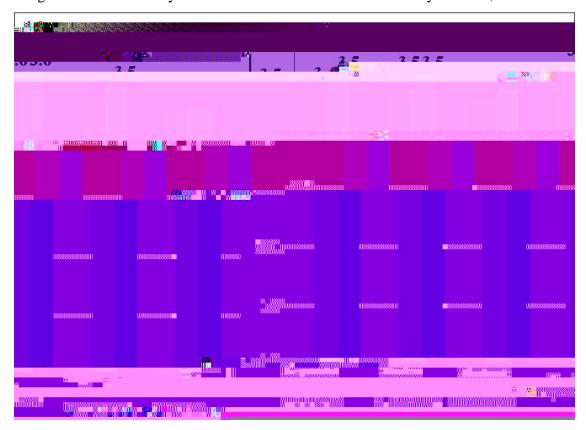

Figure 2. Parent Survey Subscales for Harris and all Elementary Schools, 2009-2010

Note. The light blue bars represent 2009-2010 data for Harris and the dark blue bars represent 2009-2010 data for all Elementary Schools.

Harris's highest score on the 2009-2010 Parent Survey was Teacher Expectations. This measure was new to the 2009-2010 survey and is designed to measure expectations parents believe that teachers have for their children. Research shows that teacher expectations relate to academic achievement. We encourage your campus to continue fostering a positive learning environment with rigorous teacher expectations for all students.

Harris's lowest score on the 2009-2010 Parent Survey was Parental Assistance, Communication, and School Involvement, which measures the extent to which parents spend with their child on school-related activities. Parental involvement contributes positively to academic achievement. For resources on how to improve parental involvement, please visit The Harvard Family Research Project: http://www.hfrp.org/complementay-learning

APPENDIX

Academic Planning Information	2007-08	Harris 2008-09	2009-10	All Elementary Schools
School staff provide me with enough				
information about	22 /0	3.4	3.4	3.5
23c. After school programs23d. Transitions to and from elementary, middle,	n/a	3.4	3.4	3.3
and high school.	n/a	3.3	3.3	3.3
