

2009-2010 AISD Campus Staff Climate Survey

Highland Park Elementary School

A healthy school climate is characterized by positive relationships among students, all campus staff, and the community. School climate is a key factor in several important outcomes including student achievement, reduced violence, higher morale, and faculty trust (Hoy, Smith, & Sweetland, 2002). More specifically, research in AISD indicates that staff climate survey results are related to student Texas Assessment of Knowledge and Skills (TAKS) performance in both math and reading (Bush-Richards, Cornetto, & Schmitt, 2008; Schmitt, 2006). The figure below represents how campus climate can facilitate student academic growth.

The image below displays factors that are known to be related to student academic growth. In this report, we focus on Staff Climate (circled in red), which has been measured with seven survey subscales: Teacher Support, Community Engagement, Collegial Leadership, Professional Teacher Behavior, Achievement Press, General Climate and Data Vision.

The graphs below depict Highland Park's staff climate ratings over time, as well staff climate ratings across all Elementary Schools in 2009-10. Scores over 3.0 are desirable, as indicated by the red dashed line in the graphs below. The first step in improving campus climate is to examine the score for each area (Figure 2).

For 2009-10, Highland Park staff rated **Behavioral Management** the highest of all climate areas. Alternatively, Highland Park staff rated **Data Vision** the lowest of all climate areas. In the appendix, you will find the individual items that make up **Behavioral Management** and **Data Vision**. Examine these items and consider possible areas for campus improvement. Make note of any item with an arrow, which indicates an average rating that is meaningfully higher or lower than that of the previous year. Discuss these areas of strength and challenge with staff, and note the ways in which initiatives on campus have addressed or could address these issues during the current or next school year.

Highland Park's lowest score on the 2009-10 staff climate survey was Data Vision, which measures the extent to which teachers utilize data in their work. Data Vision has been reported to contribute to positive academic achievement. For tips on ways to improve data use on your campus, please visit:
