

2009-2010 AISD Student Climate Survey Hill Elementary School

Research indicates that school climate can be either a positive influence on the learning environment or a significant barrier to learning. In AISD, schools that performed better on TAKS also had higher student climate ratings (Schmitt & Carney, 2008). These survey results provide campuses with feedback about how students feel about their school's educational environment. Longitudinal data are provided, where applicable.

The image below displays factors that are known to be related to student academic growth. In this report, we focus on the role of school climate for students (circled in red), which has been measured with six survey subscales: academic self-confidence, adult fairness & respect, teacher expectations, teacher support, student engagement, and behavioral environment.

In Spring 2010, 310 students returned surveys for Hill, representing 95% of eligible students from Hill (compared to the district Elementary School response rate, 87%). The table below shows the total number and percentage of students surveyed from each eligible grade at Hill in 2009-2010.

Table 1. Response Rate by Grade, 2009-2010

Hill			F2 1 Tf
Grade	Population	Response Rate	
3rd	114		
4th	105		
5th	107		
6th	n/a		
Total	326		

The graph below depicts Hill’s average student climate survey ratings, compared with average ratings for students across all Elementary Schools in 2009-2010. Scores over 3.0 are desirable, as indicated by the red dashed line. The first step in improving these characteristics is to examine the item-level scores for each area (see Appendix).

Student Climate Survey Subscales for Hill and all Elementary Schools, 2009-2010

Note. The light purple bars represent 2009-2010 data for Hill and the dark purple bars represent 2009-2010 data for all Elementary Schools.

Hill’s highest subscale score on the 2009-2010 Student Climate Survey was for Teacher Expectations, a new subscale in 2009-2010 that measures the expectations students perceive from their teachers. It is believed that Teacher Expectations are associated with academic
