

AISD Student Climate Survey: Results for Spring 2013 Through 2016

KEALING

Evidence indicates that positive school climate fosters a positive learning environment for students. Also, researchers have documented that a positive school climate helps students from economically disadvantaged schools to beat the odds (Voight, Austin, & Hanson, 2013). This report displays school climate ratings for the past four years, along with the 2016 ratings for all AISD schools at this level. New items were added in 2016 to assess students' social and emotional (SEL) skills.

Existing AISD Student Climate Survey items approximate items on the Adolescent Health School Connectedness subscale. + This item was reworded on the 2016 Student Climate Survey. This section of the report describes students' responses to 2016 survey items based on their self-reported ethnicity and gender. The table below provides the number of students who responded to the survey from each student group. Blank cells indicate when the number of students responding was less than 10.
