2009-2010 AISD Parent Survey Kealing Magnet Middle School

Strong relationships among staff, students, and parents are critical to student success. In particular, parent involvement in education is associated with a high level of student achievement (for a meta-analysis see Fan & Chen, 2001). These survey results provide campuses with feedback about how parents feel about their treatment by school staff, and the school's educational environment, and how parents describe their child's education. The following report contains the results of the 2009-2010 Parent Survey for Austin Independent School District (AISD); longitudinal data are provided where applicable.

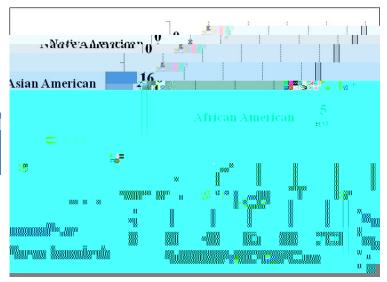

The image below displays factors that are known to be related to student academic growth. In this report, we focus on the role of parents (circled in red), which has been measured with six survey subscales: Respectful School Community; Information about Student Expectations and Progress; Academic Planning Information; Teacher Expectations; Support for Parental Involvement; and Parental Assistance, Communication and School Involvement.

In Spring 2009, 88 parents returned surveys for Kealing Magnet, representing 11% of students from Kealing Magnet (compared to the district Middle School response, 16%). Figure 1 represents the percentage of respondents with children at Kealing Magnet from each ethnic group. The tables below show the total number of surveys Kealing Magnet parents returned in 2009-2010, and the percentage of responses and students at Kealing Magnet represented by each grade.

The appendix provides more detailed information regarding Kealing Magnet's parent survey results from 2007-2008 through 2009-2010. Please review the individual items on each subscale with particular attention to how Kealing Magnet's average ratings have changed or remained consistent over time. Please note that some subscales have changed from previous years, making longitudinal comparisons inappropriate for some items and subscales. For items and subscales where longitudinal data are available, statistically meaningful changes are flagged with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.

The graph below depicts Kealing Magnet's parent survey ratings over time, as well as parent survey ratings across all Middle Schools in 2009-2010. Scores over 3.0 are desirable, as indicated by the red dashed line in the graph below. The first step in improving these characteristics is to examine the score for each area (Figure 2).

Kealing Magnet's highest score on the 2009-2010 Parent Survey was Teacher Expectations. This measure was new to the 2009-2010 survey and is designed to measure expectations parents believe
