## STUDENT CLIMATE SURVEY RESULTS 2008-2009

### Survey Report **LBJ HIGH SCHOOL**

The following report summarizes the Student Climate Survey results for the last three years at LBJ (see Table 1 for response rate). This survey measures four dimensions of a school's overall climate: *Behavioral Environment*, *Adult Fairness and Respect*, *Teacher Support and Student Engagement*, and *Academic Self-Confidence*. Research indicates that school climate can be either a positive influence on the learning environment or a significant barrier to learning. In AISD, schools that performed better on TAKS also had higher student climate ratings (Schmitt & Carney, 2008). At the high school level, schools with higher student ratings of *Academic Self-Confidence* in particular had significantly higher TAKS performance than those with less favorable ratings of *Academic Self-Confidence*. School staff should consider each dimension of climate within the context of sc

**BEHAVIORAL ENVIRONMENT**

A total of six items on the survey assess the dimension called Behavioral Environment, the respect and caring among students and the extent to which students obey the school rules and feel safe at school. Results for the individual items composing the subscale are in Table 2. Item numbers in each table correspond to the numbers on the survey.
