2009-2010 AISD Campus Staff Climate Survey

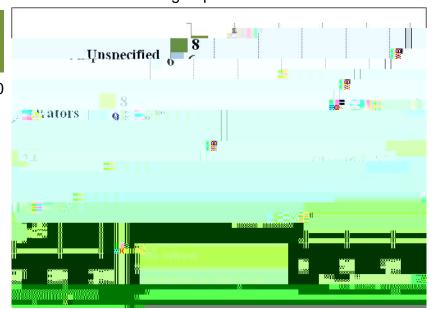

A healthy school climate is characterized by positive relationships among students, all campus staff, and the community. School climate is a key factor in several important outcomes including student achievement, reduced violence, higher morale, and faculty trust (Hoy, Smith, & Sweetland, 2002). More specifically, research in AISD indicates that staff climate survey results are related to student Texas Assessment of Knowledge and Skills (TAKS) performance in both math and reading (Bush-Richards, Cornetto, & Schmitt, 2008; Schmitt, 2006). The figure below represents how campus climate can facilitate student academic growth.

The image below displays factors that are known to be related to student academic growth. In this report, we focus on Staff Climate (circled in red), which has been measured with seven survey subscales: Teacher Support, Community Engagement, Collegial Leadership,

In Fall 2009, 97% of teachers from Maplewood responded to the survey. Figure 3 represents the percentage of respondents at Maplewood (depicted in dark green) and across all Elementary Schools (light blue) who identified themselves as teachers, classified/support staff, or administrators and non-teaching professionals, plus the number who did not specify a staff role. This information will help you to generalize the findings to the rest of your campus community.

Figure 3. Percentage of Respondents at Maplewood in 2009-10 by group and level

Staff results for Maplewood for the 2009-10 school year year are highlighted on the next page. Please pay close attention to the call-out boxes that appear in red and green as they highlight specific campus climate areas that Maplewood can improve, as well as areas in which Maplewood excels. You may visit the following websites for resources and tips on how to improve campus climate in general, and specific resources for improving the area of Maplewood's lowest subscale score are provided on the next page.

The appendix provides you with more detailed information regarding Maplewood's campus climate from 2007-08 through 2009-10. Please review the individual items on each subscale with particular attention to how Maplewood's average ratings have changed or remained consistent over time. To indicate which changes are most meaningful from year to year, statistically meaningful changes are flagged with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.

The graphs below depict Maplewood's staff climate ratings over time, as well staff climate ratings across all Elementary Schools in 2009-10. Scores over 3.0 are desirable, as indicated by the red dashed line in the graphs below. The first step in improving campus climate is to examine the score for each area (Figure 2).

For 2009-10, Maplewood staff ratechavioral Managementhe highest of all climate areas. Alternatively, Maplewood staff ratechlegial Leadership the lowest of all climate areas. In the appendix, you will find the individual items that makebapavioral Managementand Collegial Leadership Examine these items and consider possible areas for campus improvement. Make note of any item with an arrow, which indicates an average rating that is meaningfully higher or lower than that of the previous year. Discuss these areas of strength and challenge with staff, and note the ways in which initiatives on campus have addressed or could address these issues during the current or next school year.

Figure 2. Campus Climate Subscales for Maplewood from 2007-08 through 2009-10

Maplewood's highest score on the 2009-10 Campus Climate Survey was Behavioral Management, which measures how your campus addresses student behavior and classroom management. Positive ratings of Behavioral Management are associated with academic achievement. We encourage your campus to keep fosterin a positive learning environment.

Figure 3. Campus Climate Subscales for Maplewood and all Elementary Schools, 2009-10

Maplewood's lowest subscale score on the 2009-10 staff climate survey was Collegial Leadership, which measures the extent to which principals treat teachers and staff with openness, egalitarianism, and friendliness and set clear expectations for performance. Collegial Leadership has been linked to student academic achievement. For tips on ways to improve this aspect of school climate, please visit: http://www.calstatela.edu/centers/schoolclimate/research/
