2009-2010 AISD Parent Survey O. Henry Middle School

Strong relationships among staff, students, and parents are critical to student success. In particular, parent involvement in education is associated with a high level of student achievement (for a meta-analysis see Fan & Chen, 2001). These survey results provide campuses with feedback about how parents feel about their treatment by school staff, and the school's educational environment, and how parents describe their child's education. The following report contains the results of the 2009-2010 Parent Survey for Austin Independent School District (AISD); longitudinal data are provided where applicable.

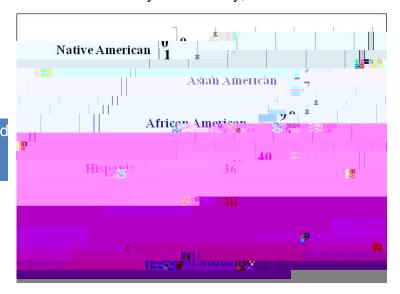

The image below displays factors that are known to be related to student academic growth. In this report, we focus on the role of parents (circled in red), which has been measured with six survey subscales: Respectful School Community; Information about Student Expectations and Progress; Academic Planning Information; Teacher Expectations; Support for Parental Involvement; and Parental Assistance, Communication and School Involvement.

In Spring 2009, 75 parents returned surveys for O. Henry, representing 7% of students from O. Henry (compared to the district Middle School response, 16%). Figure 1 represents the percentage of respondents with children at O. Henry from each ethnic group. The tables below show the total number of surveys O. Henry parents returned in 2009-2010, and the percentage of responses and students at O. Henry represented by each grade.

Number of Respondents O. Henry		
# of surveys returned	75	
# of students	1005	
% of students represented	7	

% of students represented 7				
% of stu	dents represe	nted by grad		
grade	% of respondents	% School population		
6th	33	25		
7th	27	41		
8th	37	34		

Figure 1. Percentage of Respondents and Students by Ethnicity for O. Henry, 2009-2010

Survey results for O. Henry Middle School for the 2009-2010 school year are presented on the next page. Please note the green and red text boxes that highlight specific areas in which O. Henry excels, as well as areas in which O. Henry can improve. The following websites contain resources and tips on how to improve areas measured with the parent survey.

The US Department of Education http://www.dww.ed.gov/
The National Center for Parental Involvement in Education: http://www.ncpie.org
The Harvard Family Research Projecthttp://www.hfrp.org/

The appendix provides more detailed information regarding O. Henry's parent survey results from 2007-2008 through 2009-2010. Please review the individual items on each subscale with particular attention to how O. Henry's average ratings have changed or remained consistent over time. Please note that some subscales have changed from previous years, making longitudinal comparisons inappropriate for some items and subscales. For items and subscales where longitudinal data are available, statistically meaningful changes are flagged with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.

The graph below depicts O. Henry's parent survey ratings over time, as well as parent survey ratings across all Middle Schools in 2009-2010. Scores over 3.0 are desirable, as indicated by the red dashed line in the graph below. The first step in improving these characteristics is to examine the score for each area (Figure 2).

Figure 2. Parent Survey Subscales for O. Henry and all Middle Schools, 2009-2010

Note. The light blue bars represent 2009-2010 data for O. Henry and the dark blue bars represent 2009-2010 data for all Middle Schools.

O. Henry's highest score on the 2009-2010 Parent Survey was Teacher Expectations. This measure was new to the 2009-2010 survey and is designed to measure expectations parents believe that teachers have for their children. Research shows that teacher expectations relate to academic achievement. We encourage your campus to continue fostering a positive learning environment with rigorous teacher expectations for all students.

O. Henry's lowest score on the 2009-2010 Parent Survey was Parental Assistance, Communication, and School Involvement, which measures the extent to which parents spend with their child on school-related activities. Parental involvement contributes positively to academic achievement. For resources on how to improve olvemen 02 rall yrositiv 19 otivibuth bel
