

2009-2010 AISD Student Climate Survey Oak Hill Elementary School

Research indicates that school climate can be either a positive influence on the learning environment or a significant barrier to learning. In AISD, schools that performed better on TAKS also had higher student climate ratings (Schmitt & Carney, 2008). These survey results provide campuses with feedback about how students feel about their school’s educational environment. Longitudinal data are provided, where applicable.

The image below displays factors that are known to be related to student academic growth. In this report, we focus on the role of school climate for students (circled in red), which has been measured with six survey subscales: academic self-confidence, adult fairness & respect, teacher expectations, teacher support, student engagement, and behavioral environment.

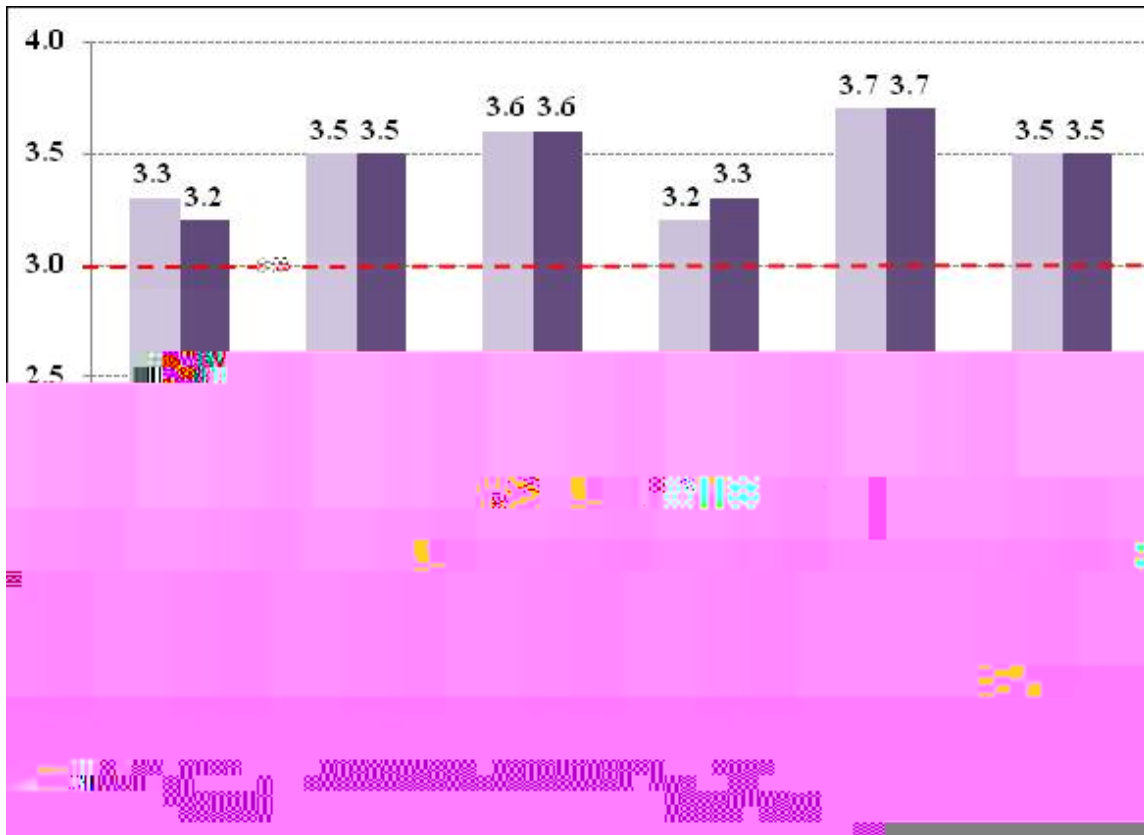

In Spring 2010, 372 students returned surveys for Oak Hill, representing 94% of eligible students from Oak Hill (compared to the district Elementary School response rate, 87%). The table below shows the total number and percentage of students surveyed from each eligible grade at Oak Hill in 2009-2010.

Table 1. Response Rate by Grade, 2009-2010

Oak Hill	
Grade	Population
3rd	138
4th	126
5th	131
6th	n/a
Total	395

The graph below depicts Oak Hill’s average student climate survey ratings, compared with average ratings for students across all Elementary Schools in 2009-2010. Scores over 3.0 are desirable, as indicated by the red dashed line. The first step in improving these characteristics is to examine the item-level scores for each area (see Appendix).

Student Climate Survey Subscales for Oak Hill and all Elementary Schools, 2009-2010

Note. The light purple bars represent 2009-2010 data for Oak Hill and the dark purple bars represent 2009-2010 data for all Elementary Schools.

Oak Hill’s highest subscale score on the 2009-2010 Student Climate Survey was for Teacher Expectations, a new subscale in 2009-2010 that measures the expectations students perceive from their teachers. It is believed that Teacher Expectations are associated with academic achievement. Please think about what your school does to foster high expectations, and share your strategies with others.

Oak Hill’s lowest subscale score on the 2009-2010 Student Climate survey was for Student Engagement. This subscale measures the extent to which students enjoy their schoolwork and learning. It is believed that Student Engagement relates to academic achievement.
