

2009-2010 AISD Parent Survey

Strong relationships among staff, students, and parents are critical to student success. In particular, parent involvement in education is associated with a high level of student achievement (for a meta-analysis see Fan & Chen, 2001). These survey results provide campuses with feedback about how parents feel about their treatment by school staff, and the school's educational environment, and how parents describe their child's education. The following report contains the results of the 2009-2010 Parent Survey for Austin Independent School District (AISD); longitudinal data are provided where applicable.

The image below displays factors that are known to be related to student academic growth. In this report, we focus on the role of parents (circled in red), which has been measured with six survey subscales: Respectful School Community; Information about Student Expectations and Progress; Academic Planning Information; Teacher Expectations; Support for Parental Involvement; and Parental Assistance, Communication and School Involvement.

In Spring 2009, 180 parents returned surveys for Paredes, representing 20% of students from Paredes (compared to the district Middle School response, 16%). Figure 1 represents the percentage of respondents with children at Paredes from each ethnic group. The tables below show the total number of surveys Paredes parents returned in 2009-2010, and the percentage of responses and students at Paredes represented by each grade.

The appendix provides more detailed information regarding Paredes's parent survey results from 2007-2008 through 2009-2010. Please review the individual items on each subscale with particular attention to how Paredes's average ratings have changed or remained consistent over time. Please note that some subscales have changed from previous years, making longitudinal comparisons inappropriate for some items and subscales. For items and subscales

The graph below depicts Paredes' parent survey ratings over time, as well as parent survey ratings across all Middle Schools in 2009-2010. Scores over 3.0 are desirable, as indicated by the red dashed line in the graph below. The first step in improving these characteristics is to examine the score for each area (Figure 2).

Paredes' highest score on the
2009-2010 Parent Survey was 4.0
