

## 2009-2010 AISD Student Climate Survey Patton Elementary School

Research indicates that school climate can be either a positive influence on the learning environment or a significant barrier to learning. In AISD, schools that performed better on TAKS also had higher student climate ratings (Schmitt & Carney, 2008). These survey results provide campuses with feedback about how students feel about their school's educational environment. Longitudinal data are provided, where applicable.

The image below displays factors that are known to be related to student academic growth. In this report, we focus on the role of school climate for students (circled in red), which has been measured with six survey subscales: academic self-confidence, adult fairness & respect, teacher expectations, teacher support, student engagement, and behavioral environment.

In Spring 2010, 280 students returned surveys for Patton, representing 85% of eligible students from Patton (compared to the district Elementary School response rate, 87%). The table below shows the total number and percentage of students surveyed from each eligible grade at Patton in 2009-2010.

Table 1. Response Rate by Grade, 2009-2010

Patton		
Grade	Population	Response Rate
<b>3rd</b>	120	74%
<b>4th</b>	107	90%
<b>5th</b>	101	94%
<b>6th</b>	n/a	n/a
<b>Total</b>	328	85%

Survey results for Patton for the 2009-2010 school year are presented on the next page. Please note the green and red text boxes that highlight specific areas in which Patton excels, as well as areas in which Patton can improve. The appendix provides more detailed information regarding Patton's student climate survey results from 2007-2008 through 2009-2010. Please review the individual items on each subscale with particular attention to how Patton's average ratings have changed or remained consistent over time. Please note that some subscales have changed from previous years, making longitudinal comparisons inappropriate for some items and subscales. For items and subscales where longitudinal data are available, statistically meaningful changes are flagged with + or - symbols. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.
