

2009-2010 AISD Parent Survey

Strong relationships among staff, students, and parents are critical to student success. In particular, parent involvement in education is associated with a high level of student achievement (for a meta-analysis see Fan & Chen, 2001). These survey results provide campuses with feedback about how parents feel about their treatment by school staff, and the school's educational environment, and how parents describe their child's education. The following report contains the results of the 2009-2010 Parent Survey for Austin Independent School District (AISD); longitudinal data are provided where applicable.

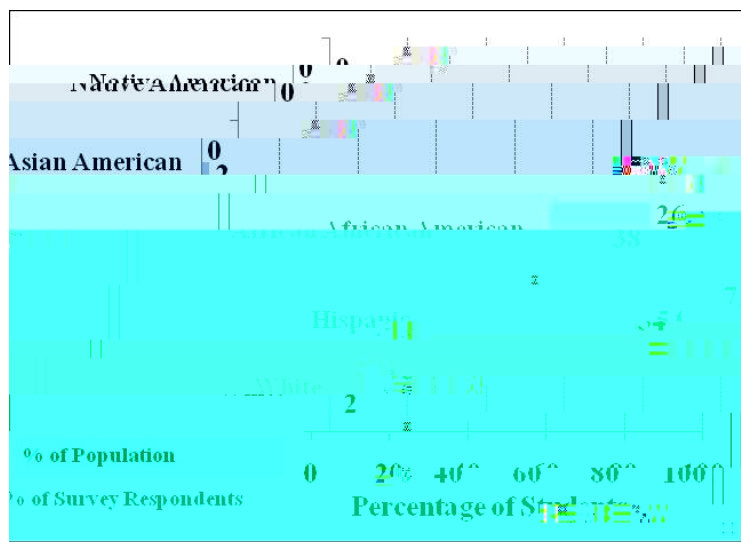

The image below displays factors that are known to be related to student academic growth. In this report, we focus on the role of parents (circled in red), which has been measured with six survey subscales: Respectful School Community; Information about Student Expectations and Progress; Academic Planning Information; Teacher Expectations; Support for Parental Involvement; and Parental Assistance, Communication and School Involvement.

In Spring 2009, 48 parents returned surveys for Reagan, representing 5% of students from Reagan (compared to the district High School response, 9%). Figure 1 represents the percentage of respondents with children at Reagan from each ethnic group. The tables below show the total number of surveys Reagan parents returned in 2009-2010, and the percentage of responses and students at Reagan represented by each grade.

Number of Respondents Reagan	
# of surveys returned	48
# of students	910
% of students represented	5

% of students represented by grade		
grade	% of respondents	% School population
9th	60	35
10th	17	20
11th	4	21
12th	13	24

Survey results for Reagan High School for the 2009-2010 school year are presented on the next page. Please note the green and red text boxes that highlight specific areas in which Reagan excels, as well as areas in which Reagan can improve. The following websites contain resources and tips on how to improve areas measured with the parent survey.

The appendix provides more detailed information regarding Reagan's parent survey results from 2007-2008 through 2009-2010. Please review the individual items on each subscale with particular attention to how Reagan's average ratings have changed or remained consistent over time. Please note that some subscales have changed from previous years, making longitudinal comparisons inappropriate for some items and subscales. For items and subscales where longitudinal data are available, statistically meaningful changes are flagged with up or down arrows. Please share the results of this report with all campus staff and your Campus Advisory Council to inform campus improvement planning.
