

2005-2006 AISD Student Climate Survey Results

Sunset Valley Elementary School

Research indicates that school climate can be either a positive influence on the learning environment or a significant barrier to learning. Positive school climate has been associated with fewer behavioral problems for students and increased achievement levels for students (Marshall, n.d.). According to Brian Perkins of the National School Boards Association (2006), research shows that improved school climate contributes to a variety of positive outcomes including higher student achievement, higher morale among students and teachers, fewer student dropouts, reduced violence, better community relations, and increased institutional pride. For these reasons, it is important to examine your school's student climate survey results to identify areas in which your campus climate is strong and areas in need of improvement.

This report summarizes the responses from your school's AISD Student Climate Survey over the last three years, an average score of 7.3 (response) - current year score of 5.5 (yearly total score) - all schools at your level this year score 7.3 (all schools).

CAMPUS RESULTS

AISD Student Climate Survey Participants, 2005-2006

		# of Participants	Response Rate
Sunset Valley	05-06	178	91.8%
All Elementary Schools	05-06	16,212	86.9%

Source: Response rates are based on Fall 2005 PEIMS enrollment data submitted to TEA for students in grades 3-11 at all regular campuses, ALC, and ACES.

Average response scores for your campus over the last three years and for all schools at your level this year are presented below for the climate dimensions and their corresponding subscales. Higher average scores indicate a more positive school climate.

Average Dimension and Subscale Scores

	2003-04	2004-05	2005-06	2006-07
<i>School Safety and Cleanliness</i>	3.35	3.35	3.38	3.27
Adult/Student Interactions	3.41	3.37	3.41	3.41
<i>Teacher Support and Engagement</i>	3.39	3.32	3.38	3.39
<i>Adult Fairness and Respect</i>	3.43	3.41	3.43	3.41
Academic Environment	3.45	3.43	3.52	3.46
<i>Academic Standards</i>	3.66	3.68	3.73	3.70
<i>Academic Self-Confidence</i>	3.37	3.35	3.45	3.39

Note: Scores may range from 1 (lowest) to 4 (highest). Up arrows indicate statistically meaningful increase (based on Cohen's D calculation of effect size) from the previous year; down arrows indicate statistically meaningful decrease from the previous year.

First, examine your campus scores for changes over time. Green upward-facing arrows indicate a statistically meaningful increase in average score from the previous year, red downward-facing arrows indicate a statistically meaningful decrease from the previous year. It is particularly important to examine the individual item responses on the following pages for any subscales with meaningful changes from year to year. If you do not see any arrows, changes in your school's dimension or subscale scores may not represent meaningful differences from year to year.

If the average score for your campus has increased in a particular area, please consider campus policies and practices that may be responsible for these improvements. Conversely, if the average score has decreased, please examine any changes on your campus that may account for these declines and consider possible strategies for improvement. Page 6 contains more information about ways to improve school climate.

Scores for your campus this year should be examined relative to the scores for all schools at your level. If your school's average score for a dimension or subscale is lower than the average for all schools at your level, individual item responses will help you to identify areas for targeted improvement efforts. Alternatively, if your school's average score for this year is higher than the average for all schools at your level, individual item responses will provide more detailed information regarding specific areas of strength to help you identify successful strategies.

The following pages contain response averages for each survey item, grouped by subscale. More detailed information regarding the percentage of students selecting each response option may be found in the Appendix at the end of this report.

BEHAVIORAL ENVIRONMENT

A total of ten items on the survey assess the dimension called Behavioral Environment, the social and physical school environment, including students' peer interactions, their expectations about school rules and their enforcement, and school safety and cleanliness. Behavioral Environment is comprised of three subscales, labeled "Peer Behavior," "Behavioral Expectations," and "School Safety and Cleanliness." Results for the three subscales and the individual items composing each subscale are presented below. Item numbers in each table correspond to the numbers on the survey.

This subscale contains four items that describe the respect and caring among students and the extent to which students obey the school rules. Average scores for each item and for the subscale are reflected in the table below.

Average Response for Peer Behavior Items

	Sunset Valley 03-04	Sunset Valley 04-05	Sunset Valley 05-06	All Elementary Schools 05-06
1. Students in my school respect each other.	2.75	2.74	2.95	2.74
2. Students at my school respect other students who are different than they are.	2.90	2.72	2.88	2.87
3. I am happy with the way students treat me at school.	2.96	2.94	3.11	2.98
14. Students at my school obey the school rules.	2.49	2.51	2.69	2.54
Peer Behavior Average	2.77	2.73	2.91	2.79

Three items comprise this subscale, which measures the clarity and enforcement of school rules and the consequences for rule violations. Average scores for each item and for the subscale are reflected in the table below.

Average Response for Behavioral Expectations Items

	Sunset Valley 03-04	Sunset Valley 04-05	Sunset Valley 05-06	All Elementary Schools 05-06
9. Everyone knows what the school rules are.	3.01	3.08	3.09	3.11
12. The school rules are strictly enforced.	3.26	3.23	3.41	3.24

Behavioral Expectations Average	3.08	3.08	3.23	3.13

The three items on this subscale indicate the degree to which students feel safe at school and perceive the school as clean. Average scores for each item and for the subscale are reflected in the table below.
