

PARENT SURVEY RESULTS 2008-2009

WEBB MIDDLE SCHOOL

Survey Report

Strong relationships among staff, students, and parents are critical to student success. In particular, parent involvement in education is associated with higher student achievement (for a meta-analysis see Fan & Chen, 2001). These survey results provide campuses with feedback about how parents feel about their treatment by school staff, the school's educational environment, and their own involvement in the school. The following report contains the results of the 2008-2009 AISD Parent Survey for Webb, and longitudinal data are provided where applicable. In addition, averages are provided for all AISD middle schools. Table 1 provides a summary of respondents for Webb. Parents who respond to this survey tend to be representative of the AISD student population in terms of ethnicity and grade level; data for the parents who responded for Webb can be found in Tables 2 and 3.

Table 1. Total Respondents for Webb Middle School, 2008-2009

	Webb	All MS
Number of surveys returned	2	2,204
Number of students	491	15,541
% of students represented	0%	14%

Note: Due to the low response, no data are reported for this school.

Table 2. Respondents' Child's Ethnicity Compared to Webb Population

	Webb Survey Respondents	Webb Population
African American	----	11%
Asian	----	0%
Hispanic	----	87%
Native American	----	0%
White	----	1%

Note. Some parents chose not to report their child's ethnicity; thus, percentages may not sum to 100%. Student population data are based on January enrollment, and may differ from the official AEIS report.

Table 3. Respondents' Child's Grade Level Compared to Webb Population

	Webb Survey Respondents	Webb Population
6 th	----	34%
7 th	----	32%
8 th	----	34%

Note. Some parents chose not to report their child's grade level; thus, percentages may not sum to 100%. Student population data are based on January enrollment, and may differ from the official AEIS report.

RESULTS FOR WEBB

Survey results for Webb for the past 3 years are summarized here, along with 2008-2009 results for all AISD middle schools. To indicate which changes are most meaningful from year to year, statistically significant changes are flagged with up or down arrows ().²⁰

The survey questions were grouped by topic into seven subscales. Table 4 on the following page provides an overview of the results by subscale, and subsequent tables provide the results for every question subscale. Parents responded to each statement by indicating their level agreement on a four-point scale ranging from "Strongly Disagree" to "Strongly Agree," with the option of indicating "Don't know/NA" or of skipping any item. It is desirable to have an average of **3.0 or higher** for each item and subscale, indicated in **bold**.

Carefully examine the results for your campus to determine areas of strength and opportunities for improvement. Areas of strength can be identified by subscale averages at or **above 3.0**. Opportunities for improvement can be identified by subscale or item averages below 2.5. If the averages for Webb are very different from those reported by parents district-wide,

Respectful School Community. This scale consists of 12 items that measure the extent to which parents perceive that staff provide a welcoming, respectful environment for students and their families. The individual item and subscale averages are provided in Table 5.

Adequacy of Communication about Student Expectations and Progress. This scale consists of 7 items that measure the adequacy of communication with parents about staff expectations for their child and their child’s academic progress. The individual item and subscale averages are provided in Table 7.
