## RESULTS FOR WEBB MIDDLE SCHOOL

Survey results for Webb for the past 3 years are summarized here. To indicate which changes are most meaningful from year to year, statistically significant changes are flagged with up or down arrows (↑ ↓).<sup>18</sup> To help put results in context, 2008-2009 results also are provided for all AISD Middle School campus staff. Table 2 provides an overview of the results for Webb by subscale for the past 3 years.

Campuses with higher Overall Climate scores are characterized by more positive relationships among administrators, staff, teachers, and students. If Webb’s Overall Climate score was over 3.0, the staff viewed the school environment positively. If Webb’s Overall Climate score was below 2.5, the campus did not have a positive school climate. Scores between 2.5 and 3.0 indicate a fair school climate. School Climate and Behavior Management subscale scores can be interpreted in a similar fashion (i.e., it is desirable to have scores at 3.0 or above). Webb’s PBS score represents the average percentage of respondents who indicated *yes* when asked about PBS-related knowledge and behaviors.

*Note:* Changes were made to the items included in the computation of Overall Climate, PBS, and Safety for 2008-2009.

In the tables that follow, please review the individual items that make up each subscale with particular attention to how Webb’s averages changed or remained consistent over time. Please share the results of this report with all campus staff and Campus Advisory Council to inform campus improvement planning.

<sup>18</sup> Effect sizes (Cohen’s d) were calculated for changes from 2006-2007 to 2007-2008 and 2007-08 to 2008-09. Effect sizes are a measure of the magnitude of the difference between two means. Mean differences were flagged as meaningful where d > .18.

**SCHOOL CLIMATE DIMENSIONS**

The first step in improving campus climate is to look at the score for each of the Climate subscales (Table 2). These scores can help in identifying areas in which staff ratings were higher or lower than the desired subscale scores.

For 2008-2009, **the highest Climate subscale for Webb was General Climate**. Examine the individual items that make up General Climate and identify those that are particularly positive. Make note of any item that has a score marked by an arrow that indicates it is statistically higher than scores for that item in previous years. Discuss this area of strength with staff and note the ways in which initiatives on campus have addressed these issues in particular during the current school year.

To improve campus climate, it is beneficial to focus on subscales with the lowest scores. For example, **for 2008-2009, the lowest Climate subscale for Webb was Achievement Press**. Examine the individual items contributing to Achievement Press in the table below. Examine these individual items and their average responses to determine possible areas for campus improvement. Often, improving climate in one dimension will have a positive effect on other dimensions.

Each of the climate items was rated on a scale from **1** (*rarely occurs*) to **4** (*very frequently occurs*). Respondents also had the option of marking *N/A*; these responses were not used to compute the item averages.

**Community Engagement**. This subscale was new in 2008-2009 and consisted of 7 items that described the extent to which the school is responsive to and supported by outside influences, such as parents or citizen groups. The individual item and average subscale scores for Webb and for all Middle School schools are shown in Table 3.

*Note.* It is desirable to have a response of at least 3.0; responses of at least 3.0 are noted in bold.

**Collegial Leadership.** Collegial Leadership involves treating teachers and staff as professional colleagues, and with openness, egalitarianism, and friendliness, but at the same time setting clear expectations and standards for performance. This subscale consisted of 7 items that addressed the degree to which the principal met the social needs of the faculty and worked toward achieving the goals of the school. The individual item and average subscale scores for Webb and for all Middle School schools are shown in Table 4.

**Professional Teacher Behavior.** This subscale consisted of 8 items that addressed the degree to which respondents indicated respect

**General Climate.** These items measure the extent to which all campus staff are friendly towards each other and work towards clear,

**SCHOOL SAFETY, BEHAVIOR MANAGEMENT, AND POSITIVE BEHAVIOR SUPPORT**

The next section of the survey addressed the safety of the school environment for students and staff, including the prevalence of undesirable student behavior on campus, staff satisfaction with how student behavior was managed on each campus, and staff familiarity with issues related to PBS.

**Undesirable Student Behaviors.** These items measured staff reports about the frequency of selected undesirable student behaviors on campus. The items were rated on a scale of 0 (*never happens*) to 4 (*happens daily*). The individual item and average subscale scores for Webb and for all Middle School schools are shown in Table 8. Items with *high* average responses (above 2.0) should be prioritized for improvement.
