USING THE RESULTS OF THE AISD PARENT SURVEY

Each survey item is presented below, followed by a bar graph containing your school's results for two years and this year's results for all campuses at your level. You will be able to identify areas in which your school's results have changed over time, and you will be able to compare the responses of your school's parents to those of parents at your level district-wide.

Please examine your results to determine areas of strength and opportunities for improvement. Areas of strength can be identified by large percentages of parents who "Strongly Agree" or "Agree" with a statement. Opportunities for improvement can be identified by large percentages of parents who "Disagree" or "Strongly Disagree" with a statement. In addition, please look for patterns in which one staff category consistently receives more positive or negative responses than other staff categories. This will help you to identify opportunities for praise and areas in which training may be necessary. District responses for all schools at your level are also provided for comparison with 2005-2006 responses from your school. If your campus percentages are very different from the percentages reported by parents
